\*container is not part of the package with the valve

## 1. General safety instructions

Before first use read the manual carefully and follow the instructions contained therein. The manufacturer is not liable for damage caused by equipment used inappropriately or by incorrect handling.

### 1.1. Intended use

1. The dispenser valve is designed for bottling honey.
2. The dispenser should be washed thoroughly before use with hot water with the addition of food-grade approved detergents and then rinsed thoroughly with clean water.

### 1.2. Operation safety

- a) The surface on which the separator with the dosing valve is standing should be stable!
- b) The device is not intended for use by persons (including children) with limited physical, sensory or mental abilities, or by inexperienced users, unless under supervision or with instructions given by an accountable party.
- c) This device is not a toy, and shouldn't be used as one. Children should not to play with it.

## 2. Instructions of use

The valve installed on the settling tank was designed for pouring honey into jars. Before use, it is advisable to place the settling tank with the valve in a place intended for its operation.

### 2.1. General rules – preparation for use

Before each season, carry out an additional technical and operational inspection.

Wash thoroughly before starting the bottling process.

### 3. Installation

1. Unscrew the nuts securing the valve gate and remove it "1".
2. Put the dispensing valve in place of the removed gate and tighten it "2".
3. Position the dispenser with the valve in place where the honey will be bottled.

Fot.1

### 3.1. Technical specifications

- conical valve made of stainless steel
- available with flanges 5/4", 6/4", 2"
- Packing dimensions:
  - length - 505 mm.
  - width - 105 mm.
  - height - 70 mm.
- weight – 1,4 kg.

## 4. Storage

Clean and dry the unit thoroughly after use. An additional technical check should be carried out periodically, and if any defects are found, please contact the manufacturer.

## 5. Cleaning and maintenance

**NOTE!**

Before first use and after finishing work the equipment must be thoroughly cleaned and dried.

The device is cleaned with hot water using a soft cloth with detergents approved for contact with food equipment and then rinsed thoroughly with clean water.

Store the appliance in a dry room.

Do not treat any parts of the appliance with chemicals.

## 6. Warranty

The product purchased from the Lyson Company is covered by a manufacturer's warranty. The warranty period is 24 months from the date of purchase.

All purchased products come with receipts or VAT invoices.
